

These are called Playlists. Click on one of these and you will see the contents of the Playlist displayed on the right-hand side screen. In the picture, you can see the “All rep” setting. It literally displays the Playlists on the left and each individual selection on the right.

During your session, you may create your own Playlists. To create your own, refer to the manual or refer to Windows Media Player HELP.

This side displays whatever is clicked on the screen to the left. This is the “All rep” screen. This is great if you wish to simply browse the library or listen to several different selections. For more specialized study and access to lyric, select an individual Playlist.
